

JOHN CHRISTIAN DE GUZMAN

AI Automation Specialist | GoHighLevel | Zapier | Make.com | n8n | Airtable | CRM Automation | Workflow Design

Jcdeguzmantrade@gmail.com | +63 906 499 6022 | Rodriguez, Rizal, Philippines | linkedin.com/in/jcdeguzman8

PROFESSIONAL SUMMARY

I have 4+ years in customer service and technical support, and over the past year I shifted focus to AI automation. I build workflows using GoHighLevel, Zapier, Make.com, n8n, and Airtable — things like lead pipelines, CRM setups, and automations that cut repetitive work. I pick up tools quickly and enjoy figuring out how to connect systems to make processes run smoother.

TECHNICAL SKILLS

- GoHighLevel (GHL) CRM
- Make.com (Integromat)
- LLM & AI Workflow Integration
- Pipeline & Funnel Building
- CRM Configuration & Management
- Email & Calendar Automation
- Google Workspace
- Zapier Automation
- n8n Workflow Automation
- Prompt Engineering
- Lead Management Automation
- Airtable Database & Automation
- Data Entry & Process Documentation
- Microsoft 365 & Notion

AUTOMATION PROJECTS

GoHighLevel CRM Automation System | Personal Project

- Set up a lead pipeline in GoHighLevel with follow-up sequences, stage triggers, and automated SMS/email messages sent to new leads.
- Created funnels and landing pages connected to the CRM so leads go straight into the pipeline without any manual input.

Multi-App Workflow Automation | Zapier, Make.com & n8n

- Wired up workflows across Zapier, Make.com, and n8n to connect CRMs, Gmail, Google Sheets, and Slack — cut manual work by around 70%.
- Set up automatic data routing, lead assignment, and notification flows across multiple platforms without writing code.

LLM-Powered Response Automation | Personal Project

- Connected an LLM to a customer-facing workflow to draft replies based on incoming messages, using prompt templates to keep the tone consistent.

Airtable Database & Workflow Automation | Personal Project

- Built an Airtable base for tracking leads and clients with intake forms, custom views, and automated alerts when records were updated.
- Linked Airtable to Zapier and Make.com so records sync across tools automatically — no manual exports needed.

WORK EXPERIENCE

Technical Support Representative | Quantrics Enterprises (Bell Canada)

Jul 2024 - Mar 2025

- Handled support for Bell Canada customers via phone and chat — mostly internet, TV, and phone issues. Diagnosed problems and walked customers through fixes step by step.
- Logged all interactions in the CRM with clear notes so the next agent had full context without needing to ask the customer to repeat themselves.

Customer Service Representative | Telus International

Aug 2022 - Feb 2024

- Took inbound calls for billing and account questions. Kept quality scores consistent even on high-volume days and escalated cases when needed.
- Noticed recurring complaint patterns and flagged them to the team lead — a few turned into process changes that cut repeat calls.

Customer Service Representative | Sitel Group

Sep 2021 - Jul 2022

- Helped customers with product questions, orders, and returns. Focused on resolving issues in one interaction without needing follow-ups.

EDUCATION

BS Information Technology - International Electronics and Technical Institute

2017 - 2018

BS Industrial Engineering - New Era University

2018 - 2019
